**Subject:** A few questions on 1,4 dioxane

Hi Henry - Thanks again for all your help regarding Navy-NG/ Bethpage. One reason why I've been asking for all this information is because we have a briefing with our new Deputy Regional Administrator (Catherine McCabe) on Wednesday. She appreciates and understands all the progress that's being made on the project. She was interested in discussing some of the points raised in the recent e-mail from the Massapequa Water District.

For Wednesday's meeting, I was asked to find out some more information regarding what method is being used to sample for 1,4-dioxane. Is this information readily available in the March'15 data report? Also, I was asked whether sampling for 1,4 dioxane is done at the VPBs, or is the data from VPBs too coarse to be able to reach the detection limits needed to identify the presence of 1,4-dioxane?

I expect to be out of the office tomorrow morning, but I should be back in the afternoon.

Thanks,  
-Carol-
